WELCOME MESSAGE

Once again - welcome to RSPO's next annual roundtable meeting on sustainable palm oil.

Last year's RT10 in 2012 was indeed significant as the RSPO commemorated its 10th Roundtable meeting with the largest number of participants from a record of 37 countries. The total global supply of palm oil that was certified sustainable was 14 percent. Membership in the RSPO grew in leaps and bounds to more than 1,000 members and it continues to do so. The RSPO Principles and Criteria (P&C) was shared in open consultation with various stakeholders during the RT10 whereby comments and feedback were actively solicited.

Today, supply of Certified Sustainable Palm Oil is at 15 percent of the total global supply of palm oil, the RSPO membership is growing beyond 1,300 and the revised P&C was accepted at the Extraordinary General Assembly with overwhelming acceptance from its members across sectors.

The RT this year will be dedicated to focus on the revised P&C and the various critical aspects. As a multi-stakeholder initiative, the first of its kind for a global commodity, RSPO perceives its progressive approach of assessing and improving its standards every 5 years to be essential in order to positively influence and transform the marketplace.

We are aware that we still have a long way ahead of us in order to achieve our overall goal of transforming markets to make sustainable palm oil the norm; which is why we will gather once again in November 2013 in Medan, Indonesia for RT11.

This year, like the many others before, delegates from all over the world representing the various stakeholders and interest groups will convene and make the best of this platform to impart knowledge, voice opinions, share perspectives, deliberate, debate and formulate future plans that will further strengthen our on-going efforts that will bring us closer towards achieving our targets.

As Henry Ford once said, "Coming together is a beginning; keeping together is progress; working together is success". Thus, let us look forward to another year of progress and continuous success at this year's RT11.

RT11 INFORMATION

VENUE AND ACCOMMODATION

The RT11 will be held at the Santika Premiere Dyandra Hotel & Convention Medan, Indonesia.

The four-star Santika Premiere Dyandra Hotel & Convention Medan, hosting the city's largest convention center, which is located only 10 minutes from the international airport, and a stone's throw from the central business district, government buildings. The two largest malls, Sun Plaza Mall and Paladium Mall are also conveniently situated nearby. With easy access from all directions, ample parking space for up to 600 vehicles, and other shopping outlets such as Gramedia Bookstore, Santika Premiere Dyandra Hotel and Convention Medan has all the ingredients for a most enjoyable stay.

LANGUAGE

The official language of the Conference will be English. Simultaneous interpretation will be available in Bahasa Indonesia only.

CONFERENCE REGISTRATION

The conference registration counter will be located at the foyer of Santika Premiere Dyandra Convention Hall. The registration counters will be operational at the following times:

11 November 2013: 5:00pm - 8:00pm

12 November 2013: 8:00am - 5:00pm

13 November 2013: 8:00am - 5:00pm

14 November 2013: 8:00am - 10:00am

COLLECTION OF GA10 PAPERS & BALLOT PAPERS

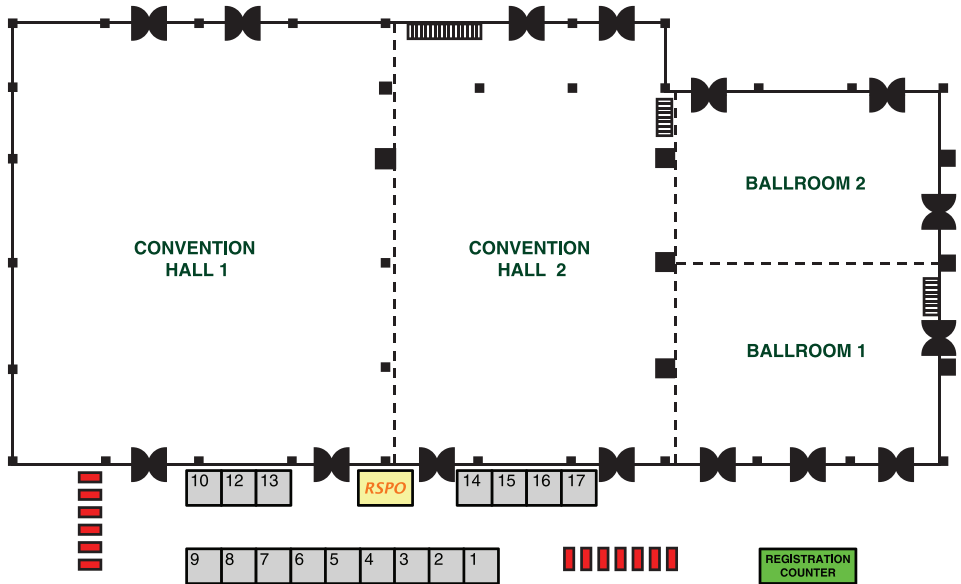

14 November 2013: 1:30pm - 3:00pm

Your conference badge, conference bag and other documents will be available to you upon registration. Please wear your delegate badge at all times during the conference for access to all conference sessions, social events and the exhibition area.

A SUSTAINABLE CONFERENCE

It is our aim where possible and appropriate to run this conference in a responsible and sustainable manner; true to our philosophy. These include the use of recycled or eco-friendly paper, the reduction in the use of paper overall, recycled cotton conference bags, etc. The contents in this conference guide have also been significantly condensed so as to reduce paper usage. Other pertinent information such as list of participants, abstracts and presentation documents will all be uploaded onto our RT11 website and the provided thumb drive which will be given to every delegate upon registration.

CONFERENCE SPONSOR

Cargill provides food, agriculture, financial and industrial products and services to the world. Together with farmers, customers, governments and communities, we help people thrive by applying our insights and nearly 150 years of experience. We have 142,000 employees in 67 countries who are committed to feeding the world in a responsible way, reducing environmental impact and improving the communities where we live and work.

Cargill is committed to sustainable palm oil production and usage. We have a commitment to supply our customers in Europe, the USA, Canada, Australia and New Zealand with RSPO certified palm oil products and/or products originating from smallholder growers by 2015 (this excludes palm kernel oil products). This commitment will be extended across all Cargill's oil and trading businesses to cover 100 percent of our palm oil products and all customers worldwide by 2020.

Our oil palm plantation - PT Hindoli in South Sumatra, Indonesia - received its RSPO certification in 2009 and followed through with ISCC certification in 2012. The plasma smallholders at our PT Hindoli plantation became the first smallholder scheme in the world to be certified under the RSPO's Smallholder Principles & Criteria in 2010. PT Hindoli has received a number of prestigious local awards including the Best Investor Award and the Platinum CSR Award. We are currently working to obtain RSPO certification for our other oil palm plantation - Harapan Sawit Lestari in West Kalimantan now.

With regards to supply chain certification, our refineries in Europe, Malaysia, United States, Australia and Russia have received RSPO mass-balance and segregated certification.

Cargill fully endorses RSPO as the global sustainability standard for palm oil products and supports the efforts of the RSPO to promote and raise awareness of sustainable palm oil as well as develop mechanisms to distinguish sustainable palm oil products in the market place.

Plantation

Sime Darby Plantation Sdn Bhd is the plantation and agri-business arm of Sime Darby Berhad - a Malaysia-based diversified multinational corporation involved in key growth sectors namely plantation, property, motors, industrial, energy & utilities and healthcare. Sime Darby operates in over 20 countries worldwide.

Today Sime Darby Plantation is one of the world's largest plantation companies, producing about 2.46 million tonnes or 5% of the world's Crude Palm Oil (CPO). Our landbank currently stands at over 858,878 hectares across Malaysia, Indonesia and Liberia, of which some 525,325 hectares have been planted mainly with oil palm.

As an integrated plantation company, Sime Darby Plantation is involved in the full spectrum of the palm oil value chain. Our Downstream business spans over 14 different countries, involving the manufacturing of oils and fats products, oleochemicals and palm oil-based biodiesel. Alongside oil palm, the Division is also involved in agri-business activities and the cultivation of rubber.

Sime Darby Plantation is committed to realizing its goal of becoming the world's premier producer of sustainable palm oil as we adhere strictly to the Principles and Criteria of the Roundtable on Sustainable Palm Oil (RSPO) of which we are also a co-founding member. As of July 2013, Sime Darby Plantation has 60 mills in which 55 are RSPO certified within our Malaysian and Indonesian operations, capable of producing more than 2.5 million MT of RSPO certified palm products annually which include palm oil and palm kernels, making us the largest producer of sustainable palm oil.

The company also invests heavily in R&D and is the first in the world to successfully sequence, assemble and became the first company in the world to annotate the oil palm genome in early 2009. This scientific breakthrough has enabled the company to move towards innovation in improving yield and output of this major food crop.

Sime Darby Plantation strives to maximize returns across the entire value chain. With continuous commitment in R&D, our upstream operations continue to seek ways to maximize yield and optimize cost, while improving productivity and efficiency. We are also constantly seeking strategic landbank for expansion and we will also continue to invest in our downstream sector, in projects and products across geographical boundaries.

As for Sime Darby Plantation's Agribusiness and Food business, our current product portfolio includes palm olein and soft oil based cooking oil (canola, soybean and corn oil and the blends of those oil with palm oil), pink guava based juices (GoFresh) and sweetened beverage creamer. All these products are distributed by Sime Darby Foods & Beverages Marketing Sdn Bhd.

RSPO
Roundtable on Sustainable Palm Oil

CONFERENCE SPONSOR

WILMAR INTERNATIONAL LIMITED

Wilmar International Limited is Asia's leading agribusiness group engaged in oil palm cultivation, oilseeds crushing, edible oils refining, sugar milling and refining, specialty fats, oleochemicals, biodiesel and fertilisers manufacturing and grains processing. At the core of Wilmar's strategy is a resilient integrated business model that encompasses the entire value chain of the agricultural commodity processing business. Headquartered in Singapore, it has over 450 manufacturing plants globally and an extensive distribution network covering more than 50 countries. The Group is backed by a multinational workforce of about 92,000 people.

As a responsible corporate citizen, Wilmar endeavours to create and build an enduring business that is economically viable, socially beneficial and environmentally sustainable. Since 2005, Wilmar has been an active member of the Roundtable on Sustainable Palm Oil (RSPO), an international multi-stakeholder organisation that promotes the production and use of sustainable palm oil. The Group adopts an environmental management system conforming to the RSPO Principles & Criteria and the United Nations Global Compact, amongst others. In managing oil palm plantations, it upholds stringent policies of zero-burning and non-development on peatland while respecting the rights of communities by adopting the 'free, prior and informed consent' (FPIC) principle.

Discussions include the characteristics of tomorrow's model for a sustainable agricultural development and its association with oil palm's development in the past decades as well as oil palm “potential”. For example:

- Producing more food on less land to ensure no deforestation and biodiversity losses
- Avoiding carbon emission due to land use change while developing new agricultural projects
- Capturing more carbon in biomass and soils
- Using agricultural practices with low environmental impacts while optimising the use of ecological services for achieving high yield
- Integrating and supporting smallholder schemes in development projects.

Key topics of ICOPE 2014:

- Deforestation: How to reach a zero deforestation development?
- Contribution of yield improvement to global sustainability.
- GHG: How to reach a zero emission palm oil production?
- Sparing or sharing land: A pertinent debate for the oil palm industry.
- The place for sustainable oil palm development for local communities.

SPONSOR

GreenPalm exclusively operates the RSPO Book & Claim supply chain option. The platform allows RSPO certified plantations to convert their certified palm, palm kernel and Palm kernel expeller into GreenPalm certificates. Offers for these certificates are placed on the GreenPalm market, 1 tonne of RSPO certified palm oil = 1 GreenPalm CPO certificate. Product manufacturers that use palm, palm kernel oil or any derivatives & fraction can place offers for these certificates - offsetting their annual physical usage. Since 2008 over 7 million tonnes of RSPO certified palm has been sold via GreenPalm.

SPONSOR

Rabobank

Rabobank Group is Dutch international financial services provider operating on the basis of cooperative principles.

Internationally, the Group's focus is on providing customised banking and financing solutions to food and agribusiness clients and commodity traders worldwide - from financing palm oil plantations and inventory, to hedging against volatile palm oil prices or optimally structuring capital.

With a presences in 42 countries, Rabobank provide one-stop financing solutions around the world, linking origins to destinations.

Being a member of the Executive Board of RSPO, Rabobank is committed to promoting sustainable financing of the palm oil industry, and realising a sustainable global production chain.

As a major financier of the commodities value chain, Rabobank was awarded "Best Global Soft Commodity Bank" in 2011, 2012 and 2013 by Euromoney magazine. For more information, visit our website www.rabobank.com

PROFILE OF EXHIBITORS

Sustainable Growth with Scheme Smallholders

Asian Agri is one of the leading palm oil companies and a pioneer of the national smallholders scheme in Indonesia. Our palm oil operations span 3 provinces in Sumatra with 160,000 ha of planted plantation, of which 60,000 ha are in partnership with 29,000 smallholders in Riau & Jambi provinces. We are fully committed to the principles of sustainable palm oil, and have obtained certification in Round Table for Sustainable Palm Oil (RSPO), Indonesian Sustainable Palm Oil (ISPO) and the International Sustainability & Carbon Certification (ISCC).

To date, over 22,000 hectares of our own plantations are already RSPO certified and 100,000 hectares are ISCC certified. We have also helped our smallholder farmers obtain RSPO and ISCC certification for over 42,000 hectares.” This commitment to sustainability and smallholder partnerships has led Asian Agri to become the company with the biggest number of RSPO and ISCC certified smallholders in Indonesia.

The Biodiversity and Agricultural Commodities Program (BACP) is a multi-donor initiative with contributions from the Global Environment Facility, the International Finance Corporation, and the governments of Italy, Japan, Luxembourg, the Netherlands, New Zealand, and Norway.

BACP seeks to reduce the threats posed by agriculture to bio-diversity of global significance by transforming commodity markets for cocoa, palm oil and soy. To transform the commodity markets, BACP supports projects that generate greater supply, demand and financing of biodiversity-friendly products.

For more information, visit <http://www.ifc.org/bacp>.

PROFILE OF EXHIBITORS

Daemeter is a leading independent consulting firm promoting sustainable development through responsible and equitable management of natural resources, particularly in Asia's emerging economies. With offices in Indonesia and USA, we offer a wide range of professional services to the forestry, agriculture, finance, energy, mining and international development sectors, among others, supporting clients and partners in achieving their social and environmental objectives.

PT Earthline based in Jakarta, provides high resolution satellite imagery, survey and mapping services.

The company was established in December 2001 and serves various sectors with a focus on plantations and mining primarily in Indonesia and Malaysia. Over the past twelve years Earthline has provided customers with over 15,000,000 hectares (1,000 orders) of high resolution satellite imagery for multiple applications in various sectors. In the third quarter of 2012, PT Earthline is adding Drone Aerial Photography to its business, to facilitate the higher resolution imagery and short timeframe demands.
